Notes to Editors:

Information on MHP

MHP is the leading producer of poultry products in Ukraine with the greatest market share and highest brand recognition for its products. MHP owns and operates each of the key stages of chicken production processes, from feed grains and fodder production to egg hatching and grow out to processing, marketing, distribution and sales (including through MHP's franchise outlets). Vertical integration reduces MHP's dependence on suppliers and its exposure to increases in raw material prices. In addition to cost efficiency, vertical integration also allows MHP to maintain strict biosecurity and to control the quality of its inputs and the resulting quality and consistency of its products through to the point of sale. To support its sales, MHP maintains a distribution network consisting of 11 distribution and logistical centres, within major Ukrainian cities. MHP uses its trucks for the distribution of its products, which Management believes reduces overall transportation costs and delivery times.

MHP also has a leading grain cultivation business growing corn to support the vertical integration of its chicken production and increasingly other grains, such as wheat and rape, for sale to third parties. MHP leases agricultural land located primarily in the highly fertile black soil regions of Ukraine.

Since May 15, 2008, MHP has traded on the London Stock Exchange under the ticker symbol MHPC.
